## WELCOME TO AREA 88.

A year ago, a ruthless army of mercenaries swept across the kingdom of Aslan and destroyed everything in their path. Guided by the arms dealers of Project 4, the mercenaries now control every area of the country — except one.

On a tiny piece of desert lies the last hope of the people of Aslan. There, in a small corner of Area 88, are the world's finest pilots — the UN Squadron. For months they have been waiting for the exact moment to begin their assault on the forces of Project 4. That moment has just arrived.

Each pilot begins his tour of duty with \$3000 in his flight account and an unlimited number of F8E Crusader aircraft. As you destroy air and ground targets, money will be added to your flight account. This money can be used to purchase additional aircraft and weapon systems to help increase your chance of survival. And only the best survive.

## SURVIVAL TACTICS

To destroy a target, you must find and attack its weak point. When the weak point is hit the entire enemy will flash. Keep hitting this point until the target goes up in flames.

Before you purchase a new aircraft, make sure you have enough money left over to outfit it with special weapons.

Try not to take too many special weapons on each mission. It's very easy to spend a lot of money on weapons and then get shot down before you get a chance to use them.

If you need extra money, wait for the supply trucks to appear and attack them. It is an easy \$20,000.
